

Classroom Supply List

Dear Teacher,

As the new school year approaches, an important part of getting your students ready to learn is by helping them stay healthy and in class.

One way to achieve this is by encouraging parents to provide their children with the essentials both for learning and for avoiding the spread of illness-causing germs. We've created a handy Classroom Supply List that you can download from www.lysol.com/our-mission/ and tailor with your own preferences before printing.

We hope this makes it easier for you to remind parents that a healthy environment for learning is the best way for their children to succeed!

Thank you for your support!

Classroom Supply List
